## AIRSHIP DVR & NVR SYSTEMS

You need an enterprise recording system that is stable, reliable, economical and easy to use.

Airship gives you all the bells and whistles built around a high-powered core: Enterprise-proven, high definition and high density IP and Analog recording.

- **Superior software designed, developed and tested in-house**
- **H.264 / MPEG4-AVC compression**
- **Real-time hi-resolution video on all channels simultaneously**
- **Scalable from a few cameras to thousands**
- **Automated alarms & alarm handling**
- **Automated scheduling**
- **IP/megapixel & PTZ camera support**
- **Electronic mapping**
- **Advanced search**
- **Executable evidence export**

## PERFORMANCE BACKED BY SUPPORT

For years, we've been building reliable, proven software for some of the industry's largest providers of surveillance video management.

Now, we offer our leading technologies under our own name — **Airship**.

We design and develop our own software. Our customer care and technical support is also here, not offshore. When you call, we answer the phone.

With expertise in systems design and H.264 hardware compression, we know how to build — and support — a video management system without compromise.

And we offer the best value in the industry.

All Airship products come with:

- **A painless 30-day money-back guarantee**
- **A full year of free software upgrades**
- **A three-year hardware warranty with on-site next-business-day service and parts replacement**

Airship: easy-to-use, advanced open-platform systems that just plain work. Get the best performing and best-priced systems on the market.

# THE AIRSHIP COMPREHENSIVE ENTERPRISE VIDEO SYSTEM

## Airship Health Monitor™ with Failover protection

Airship automatically deals with system problems — without crisis or missed recording.

## Airship Incident Reporting with Automatic Archive Server

Airship takes on the burden of identifying, researching, archiving, and reporting security incidents — a single simple-to-use interface makes it easy and saves money.

## Virtual matrix

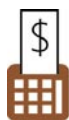

Display any available camera on any system monitor with many custom video displays.

## Video analytics

Use almost any analytics package with the open-platform Airship Comprehensive Enterprise Video System. In 2008, our own Airship Analytics™ will put differentiated and directional automobile or human subject tracking and counting into single-console management for less than half the typical price tag.

## Airship POS Client

Not just a simple overlay; we associate your point-of-sale transaction data with corresponding video, making it searchable by many video and POS criteria.

## Keyboard integration

Airship gives you the IT-level system monitoring & management you need

## AIRSHIP VIDEO WORKSTATIONS

Get more real-time video playing at once: Watch 16 or more recordings from your Airship DVR Servers.

- **Dedicated H.264 hardware decoders**
- **Dual-monitor support for simultaneous live video and playback**
- **Manage thousands of cameras on hundreds of Airship servers from a single interface**
- **Authenticated, easy evidence export with CD/DVD burner**
