FOR IMMEDIATE RELEASE

Airship Industries to provide a next-generation surveillance system for Angel of the Winds Casino

Bellevue, Washington — March 3, 2008

Airship Industries, a Bellevue, Wash. developer of high-performance enterprise video surveillance solutions, announced today that its Airship Comprehensive Enterprise Video System has been chosen by Angel of the Winds Casino in Arlington, Wash. to replace the casino's legacy video surveillance system.

At the core of the large enterprise system Airship is building for Angel of the Winds is an array of 24-channel 4CIF IP-analog hybrid digital video recorders with H.264 hardware compression. The DVRs will be centrally managed by Airship DVR Manager software running on an Airship Enterprise Management Server.

The Airship Comprehensive Enterprise Video System at Angel of the Winds will include Airship OP Workstations for full-resolution playback and real-time live viewing. The system will also include an Automatic Archive Server, failover capabilities, integration with the casino's American Dynamics matrix and a virtual matrix for their video wall, point-of-sale integration via the Airship POS Client, and incident reporting.

"All of us at Airship are looking forward to working with Angel of the Winds to provide them with a true enterprise video recording and management system that will take them into their new facility and into the next decade," said Doug Overtsreet, Airship's VP of Sales. "Airship will allow them to do everything they have on their list of needs for today's integration, and will allow them to incorporate newer technology as they decide to bring it on board. In addition, it's going to be fun for us at Airship. This is a wonderful organization to work with. All of us are eager to start."

About Airship

Airship Industries, located in Bellevue, WA on Seattle's Eastside, is a software development house with expertise in systems design and hardware compression. Since

2003, **Airship** hardware and software has been successfully deployed under industry-giant OEM brand names in enterprise environments from museums to casinos.

Airship Industries makes enterprise-grade systems that are scalable from 4 to thousands of cameras on a centrally-managed network. “And we do it for a very good price. **Airship** is a company pioneering a platform of enterprise-grade performance that is scalable enough and affordable enough that virtually any organization can benefit.”
